# Executive summary

Ever since its conception; blockchain has presented itself as a revolutionary technological force set out to disrupt and offer an improvement over the old paradigms which govern a vast array of industries. In doing so, cryptocurrency; the lifeblood of blockchain technology, has quickly established itself as one of the fastest growing asset classes in our recent history.

The opportunities blockchain technology has to offer have not gone unnoticed. This is exemplified by the ever increasing number of established- and emerging companies employing blockchain technology, as well as government bodies that are exploring its implementation on a global scale.

While the tech savvy and attentive venture capitalists have long since discovered the cryptocurrency market, there still are a lot of institutional and retail investors that have yet to enter the market. Especially to note are the latter.

Presented with the prospects of making incredible returns on investments, fueled by popular media and a relatively low barrier of entry, people from all over the world- and walks of life are now taking their first steps into speculative investing through cryptocurrencies. Retail investors are entering the market at such a staggering pace that many of the popular exchanges are having troubles keeping up with demand. As a result of this influx many of these exchanges have been forced to periodically halt new registrations, some even had to halt trading altogether just to cope with the stress put on their servers. In light of this, one could say; the future of cryptocurrency and blockchain technology does look very bright indeed.

The market segment Invest Platform is targeting with its services is that of beginning- and experienced retail investors. From our preliminary market analysis we have identified several pains present in this segment that we are resolved to tackle. It has come to our attention that on the one hand, successful and experienced crypto-traders often lack the means or reach to attract additional investment funds by offering their services. On the other hand, we have inexperienced investors that are in desperate want for such services due to a lack of time, or necessary technical- and psychological skills.

To address this need Invest Platform offers its users a feeless platform enabling trustless API-based copy-trading for experienced and beginner cryptocurrency traders. Through an easy to use platform interface, users will be able to copy experienced traders directly and without effort on the exchange(s) of their preference, all the while keeping full control over their funds and private keys.

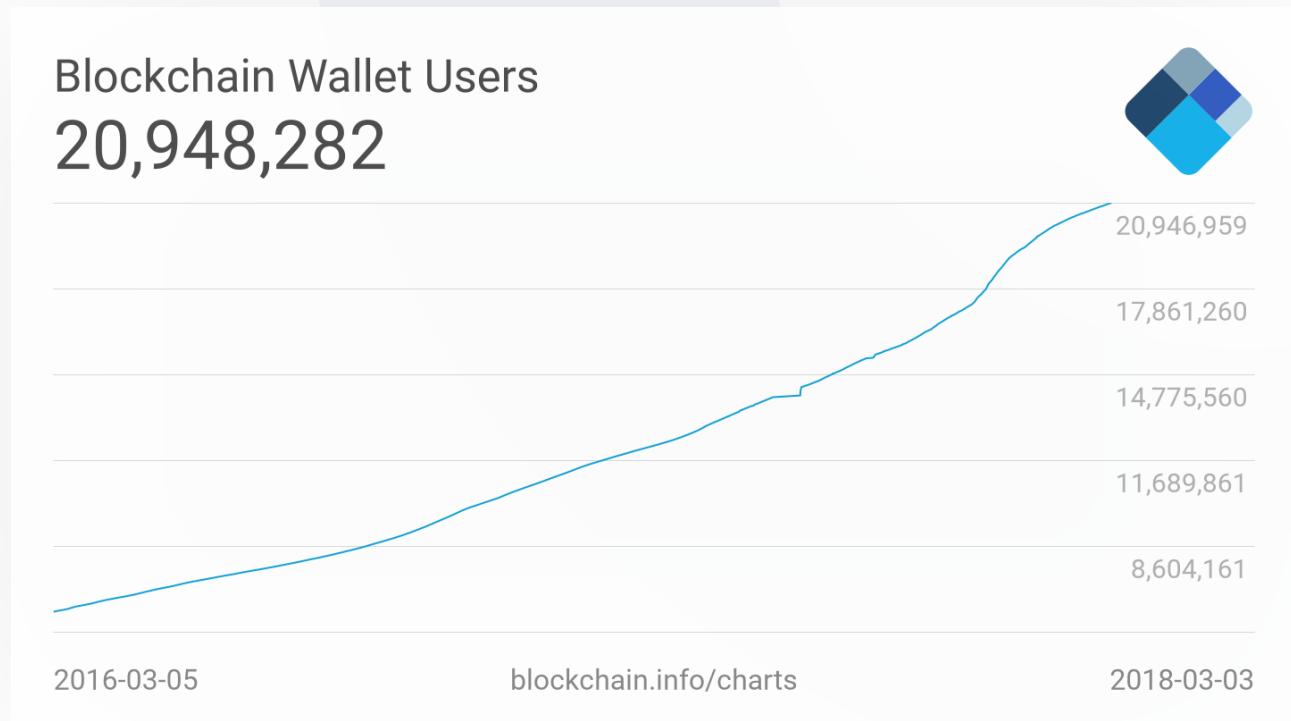

# Market Analysis

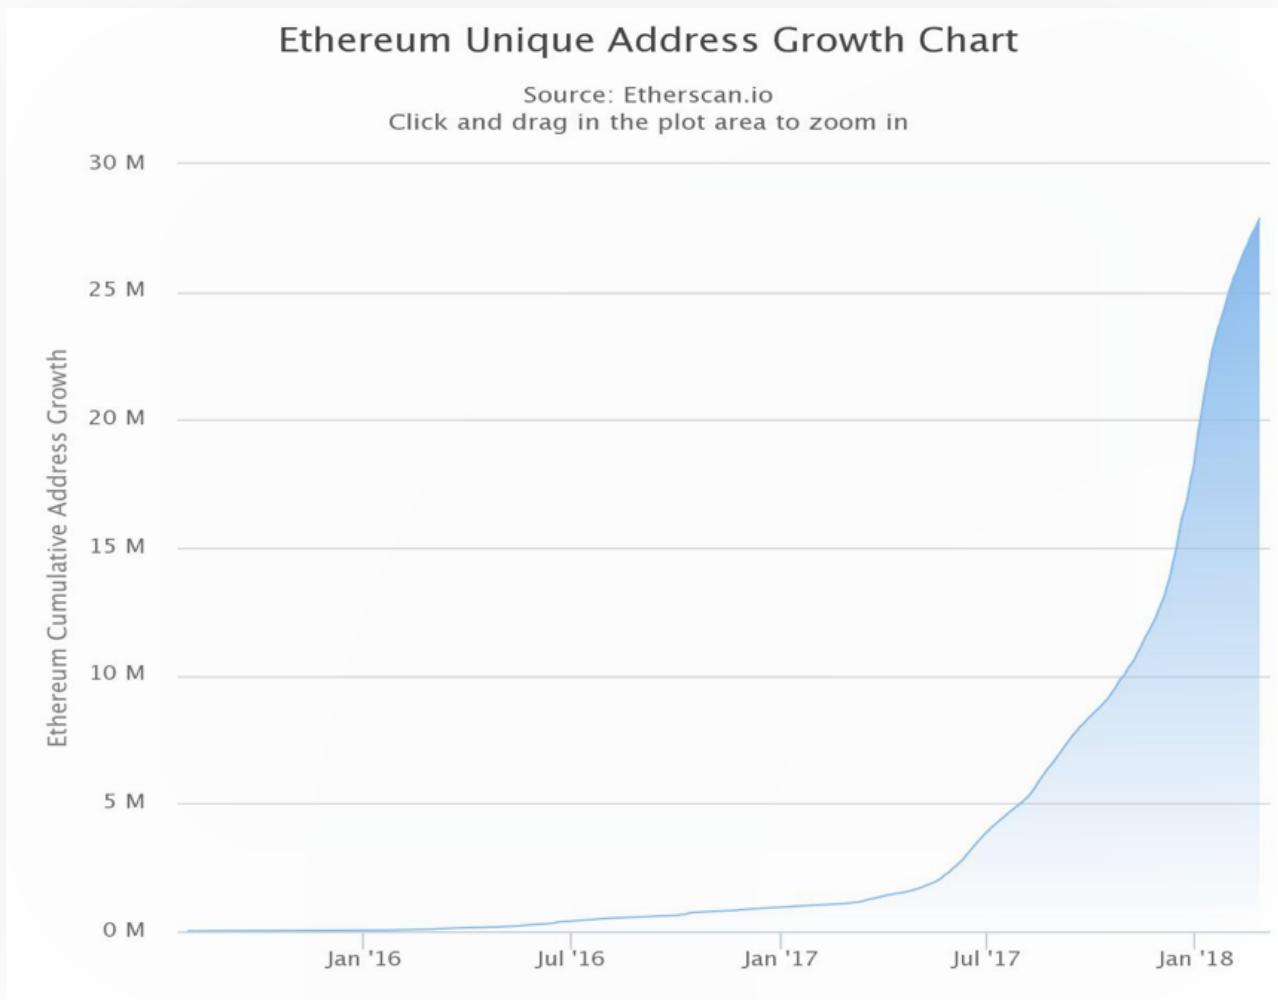

Our market analysis serves to provide a very basic and general impression of the scope and growth rate of the market segment that Invest platform will be targeting. Next we identify and discuss the pains and challenges retail investors currently face, which Invest Platform is resolved to tackle.

## Market Segment - Retail investors

According to a news article published on November 2, 2017 by Bloomberg, the popular exchange Coinbase Inc. added over 100,000 users in just 24 hours time. Instead of being an exceptional occurrence we've since seen several such reports appearing on news websites. Most notable were Binance's record setting registration of 240,000 new users in the span of one hour; And the most recent press release of Robinhood, boasting a 1,000,000 applicant waiting list since they announced to be adding cryptocurrencies to their exchange.

These staggering numbers are reflected in the wallet statistics of the two biggest cryptocurrencies (by market cap):

The above is just a very small selection of news articles and possible data points intended to illustrate the general point we want to make: the number of retail investors are increasing at an unprecedented rate. As such we believe that this gives us an optimal opportunity to capitalize on the needs and wants of this growing segment in the market.

## Identifying the needs and wants of retail investors

Cryptocurrency, thanks to its open and decentralised nature, offers a relatively low barrier of entry for anyone interested. Theoretically, anyone, regardless of socio-economical or geological/ethnic background, who has access to the internet ,has the means to set up a cryptocurrency wallet and begin trading.

And in 2014 we at Invest Platform did just that. We opened a wallet and began investing in cryptocurrencies.

However, as we all soon learned, trading isn't as easy or straightforward as one would hope. As we were taking our first steps it became apparent that it was nearly impossible for us to keep track of all the information floating around about all the cryptocurrencies we were invested in.

Even today there still aren't any services that aggregate this information into an 'easy to digest' format. Information is still spread all over social media, from the depths of reddit to some comment on telegram. Even more difficult than browsing the social media we knew of was finding information about cryptocurrencies who's main targeted audience was China. As much as we wanted to stay up to date, learning Chinese just wasn't a realistic prospect.

Besides the issues we've experienced with simply finding and reading all the information out there; we were still confronted with perhaps our biggest limitation: **Time**.

We simply didn't have enough time to read it all! We all have full time jobs and responsibilities outside of our jobs. Trying to squeeze the little free time we had for crypto-trading just didn't cut it. Especially considering this market is open 24/7. To our frustration we've watched our profits melt away as we went to bed.

But it wasn't all bad, we did make some profitable trades... only to realize that those trades may have appeared profitable when expressed in USD, but looked quite depressing when expressed in BTC or ETH.

Or that time we sold a crypto-asset that suddenly gained 20% after months of being down -5%. Thinking we were geniuses who managed to cut their losses and even made some profits while doing so! Only to revisit coinmarketcap a couple of weeks later and see that same crypto-asset suddenly making its way up the top 100 list. You can imagine our frustration as we watched all those potential profits go by.

Quite quickly it became painfully apparent to us that we were lacking the technical- and psychological skills necessary to become a good trader.

# Why do beginning traders lose money?

If our story sounds familiar to you, it is because we've experienced all the main reasons why beginning traders lose money:

- They don't have the time to properly research their investments.
- They don't have enough knowledge about technical analysis.
- They don't have enough experience with cryptocurrency exchanges.
- They don't have the right psychological mindset.
- They don't have the patience.

Put all these reasons together and you've got a recipe for lost opportunities and an even greater loss of value.

On the other side of the story we have the experienced investors, which we will take a look at in the following.

# What do experienced investors lack?

Experienced investors and traders possess all the necessary skills to thrive in the cryptocurrency market. However, unlike the traditional market, they lack the availability to maximally capitalize on their skills. While successful stock traders have the option to sell their skills to financial institutions, we've found that crypto-traders do not have similar opportunities. Oftentimes successful traders work relatively isolated, discussing and gathering information on social media platforms with like minded people, but unable to monetize on their sharing of ideas and strategies.

What experienced and successful crypto-investors lack can be condensed in one sentence:

- They have very few options to sell their skills to those who would benefit from these skills.

By offering a feeless platform enabling trustless API-based copy-trading Invest Platform offers a direct solution to the problems faced by beginning- and experienced cryptocurrency traders.

# Invest Platform

## What is invest platform?

The concept of Invest Platform is quite simple:

An experienced investor, who has a proven track-record, can choose to share his trading strategy with other users. Beginners (or experienced traders who are in need of a break) can then follow any trader that shares his strategy on our platform, simply by subscribing to that particular trader.

Both the experienced trader and the user who subscribed to the trader are linked through an API. This way any sell or buy order the experienced trader makes is automatically copied to your account, on the exchange of your choice.

The main advantages of using an API service is that **you remain in full control** over your funds, private keys and choice of exchange (e.g. Bittrex, Binance, GDAX, Poloniex, Bitfinex).

Our goal is to bring together beginning- and experienced traders in a win-win situation. Because of our platform, each user increases the opportunity to maximize their profits. The beginning trader does so by enjoying the skills and success of experienced traders; while experienced traders do so by having the ability to offer their paid services to a large audience.

Amateur

Experienced

- Earn by investing in the same positions as an experienced investor.
- Gain valuable knowledge from experienced investors.
- Be able to discuss and ask questions directly to an experienced investor in the chat.
- Share knowledge with the users who are subscribed.
- Doesn't pay any commission!
- Grow their earnings, status and following through our ranking system.

# What sets Invest platform apart from the competition?

	Covesting	Coindash	Tradershub	Invest Platform
No platform fees	✗	✗	✗	✓
No fees on profit	✗	✗	✗	✓
No internal wallet	✗	✗	✗	✓
Community members	High	Low	Medium	High
Transparent review system	✗	✗	✗	✓
Community chat	✗	✗	✓	✓

In contrast to competitive platforms offering similar services, our platform has several key advantages which we would like to highlight:

- **No hidden fees** - Competitive systems are expensive and demand exuberant fees. The Invest Platform offers a free platform based service that brings both beginning and experienced traders together. Our platform is accessible through the staking of INV tokens and only charges 10% on the profits made by users following a trader of their preference. For a detailed discussion please refer to '*Invest (INV) Token*'.

- **Safety** - Competitive systems require users to deposit money into their own wallets. This leaves users at risk of potential theft. Our platform has taken a different approach. By connecting our users through an API, you keep access to your money at all times. Not only will this save you valuable time from not having to send funds from and to wallets; more importantly, you will not be exposed to theft. As an additional safety measure we have limited the API intractability to only being able to open and close positions. Withdrawals will be blocked at the API level. Our platform itself will be secured by Google two-factor authentication, text-message authentication and IP whitelisting.
- **Community** - Our platform is open to all traders. Each user will be able to acquire a ranking which reflects his level or skill and trust on our platform. This opens the possibility to anyone, who has the sufficient ranking, to gather subscribers and earn for offering their services. In addition, each user will be able to share their ideas and technical analysis directly with their subscribers via our chat.
- **Traders** - The experienced investor assuming position, builds trust and ranking on our platform. Each investor will be classified with our ***proprietary level system***. The better track-record the investor has, the higher level he gets. This allows the trader to attract a greater potential following.

# A first look at invest platform's interface and functionality

## Dashboard

This is the main screen on our platform and contains the most important information about the user's account.

The screenshot shows the invest platform's dashboard. At the top, there is a navigation bar with the logo, 'Invest', 'Dashboard', 'Markets', 'Traders', and 'Support'. On the right, there is a user profile for 'Paul Miller' with a small photo, a 'Followers' count of 242, and a 'Follow' button. Below the navigation bar, the word 'Dashboard' is centered. To the right, there is a 'Followers' count of 242 and a 'Follow' button. The dashboard is divided into several sections:

- Statistics:** A line graph showing performance metrics over time (Week, Month, Year). The Y-axis ranges from 0 to 60. The X-axis shows dates: Feb 1-7, Feb 7-14, Feb 14-21, and Feb 21-28. Two lines are plotted: one purple line (Open) and one blue line (Closed). The blue line has a peak around Feb 14-21.
- Your trades:** A table showing recent trades. It includes columns for pair (e.g., BTC/USDT), exchange (e.g., Bittrex), percentage change (-5%), and date (e.g., 202.2018). There are three entries: BTC/USDT, BTC/ETH, and BTC/DASH.
- Successful traders:** A list of users with their names, profile pictures, follower counts, and recent performance percentages. Three users are listed: Nicolas May (325 followers, +20%), Andrew Philips (248 followers, +19%), and Anthony Mayers (150 followers, +15%).
- Deposit:** A table showing deposits for different cryptocurrencies: BTC (0.51), USDT (100.15), and ETH (15.55).
- Profit this month:** A circular gauge showing a 4.7% profit increase.

## Statistics

A graph showing the user's performance statistics in a week/month or year range.

## Connections

The number of people who follow the user's profile.

## Your Trades

List of open or closed positions and percentage of earnings or losses.

## Successful traders

A section showing the highest performing investors in the last 30 days. The user can view each of these investors and check the statistics.

## Deposit

By combining API with your favourite cryptocurrency exchange, we can generate a preview of your funds deposited on the exchange.

## Profit in the last 30 days

Calculates the profit or loss of the last 30 days.

## Chat

Allows users to communicate with other users.

## Settings

Basic user profile settings, cryptocurrency exchange, APIs settings, two-factor authentication security.

# Traders

## Successful traders

The list of all traders registered in our system sorted by performance ranking; from best to worst. Each profile has information about the current level of the user, the number of people who follow his profile and statistics of earnings. Each user has access to archival statistics of other users, but currently opened positions are available only to users who subscribe to the selected profile.

The screenshot shows the 'Successful traders' section of the C Invest website. At the top, there is a navigation bar with links for Dashboard, Markets, Traders (which is the active tab), and Support. On the right side of the header, there is a user profile for 'Paul Miller' (Lv1) with a green badge, showing he joined on 'Since 12 Feb. 18'. Below the header, there is a search bar and some filter options. The main content area is titled 'Successful traders' and displays a table of six trader profiles. Each profile includes a small profile picture, the trader's name, their current subscription level (e.g., Lv1, Lv2, Lv4, Lv5), the number of followers, and performance statistics for the last 7 days, 14 days, 30 days, 3 months, and 6 months. The table also has a column for 'All' performance. At the bottom of the table, there are pagination controls labeled 'Prev', '1', '2' (which is highlighted in blue), '3', '4', '5', '...', '24', and 'Next'.

Nick	Followers	Last 7 days	Last 14 days	Last 30 days	Last 3 months	Last 6 months	All
Nicolas May <span>Lv1</span>	425	+5%	+15%	+15%	+15%	+15%	+15%
Thomas Philips <span>Lv2</span>	402	+5%	+13%	+11%	+12%	+16%	+15%
Mateusz Fraczek <span>Lv1</span>	398	+4%	+12%	+10%	+9%	+10%	+14%
Lukasz Jackiewicz <span>Lv4</span>	300	+3%	+19%	+25%	+13%	+9%	+12%
Peter Larsson <span>Lv1</span>	243	-1%	+7%	+11%	+5%	+18%	+8%
Andy Johansson <span>Lv5</span>	150	+2%	-2%	+12%	+10%	+8%	+6%

## Subscription level

This displays the subscription level of the user.

# Markets

The list of all supported cryptocurrency markets available on our platform.

# Market details

All data about the selected cryptocurrency.

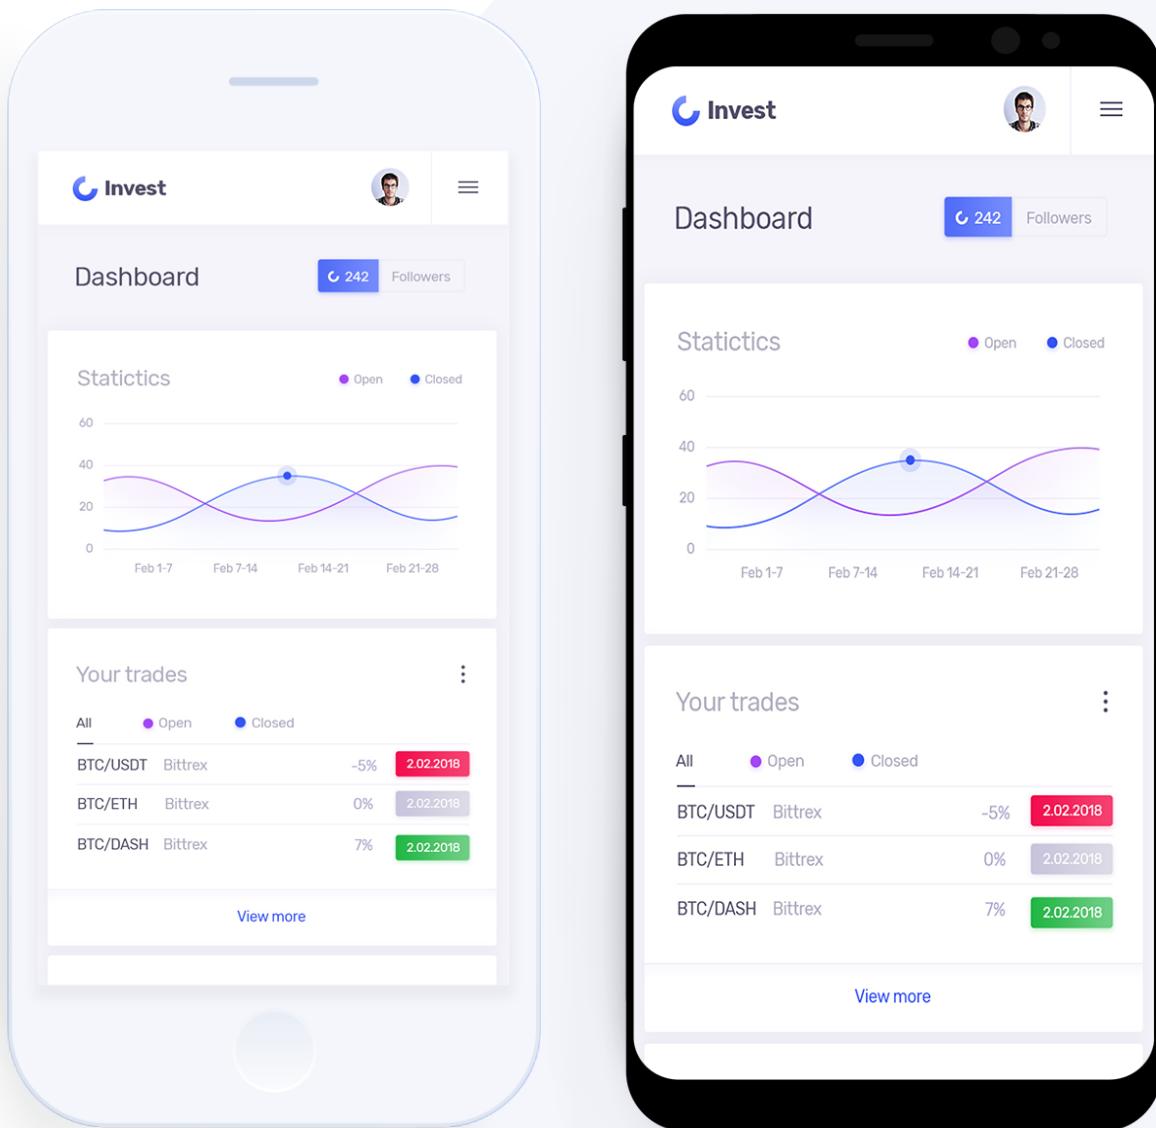

The screenshot displays the 'Information' section of the platform. On the left, there's a chart titled 'Data' showing price fluctuations over a 30-minute period from 12:00 to 6:00. The chart features green and red candlesticks on a grid with horizontal lines at 1500-unit intervals. On the right, a detailed 'Bitcoin (BTC)' market summary is shown, listing various metrics with their current values: **Bvol** (\$0.40, \$0.00004027), **Bid** (\$0.40, \$0.00004027), **Ask** (\$0.40, \$0.00004027), **24High** (\$0.40, \$0.00004027), **24Low** (\$0.40, \$0.00004027), and **Last** (\$0.40, \$0.00004027). A 'View more' button is located at the bottom of this panel. Below the chart and summary, the 'Trading' section is visible, featuring buttons for 'Buy Ethernun' (0.00000209 BTC Available) and 'Sell Ethernun' (0 ETH Available), along with a blue message icon.

The main screen from which every user can establish positions on the cryptocurrency market. Here you can find all the necessary elements for trading. All elements are available thanks to the connection of the API with the cryptocurrency exchanges.

# Mobile applications

Our platform will be also available for Android and iOS mobile devices.

INVEST IN THE FUTURE

 kraken

BITSTAMP

 CRYPTOTPIA

 CCEx

Liqui 

 Vaultoro

## Developed Technology

Our team uses popular development of technologies and databases like PHP, Ruby on Rails, JavaScript, MySQL, Swift, Objective-C, Kotlin, Java.

To use the Invest Platform it will be necessary to have ERC20 token INV. Users will be motivated to receive these tokens for their work and setting up positions that bring profit.

Currently, we are working on 1.0 version of our system, which will contain all the necessary functionalities needed for proper use of the platform. The system will be connected to the Bittrex exchange because it is the favourite cryptocurrency exchange of many traders.

In version 2.0 of the system, new functions will be included, including those proposed by our users. The system will be combined with the next cryptocurrency exchanges Binance, GDAX, Poloniex, Bitfinex, Kraken, Bitstamp, Cryptopia.

# Invest (INV) Token

Invest token (INV) will serve as a means of staking and the main payment unit on our platform, essentially functioning as an internal currency.

INV will be implemented as an ERC20 token on the Ethereum blockchain. The Ethereum blockchain has been chosen for this project due to its wide application and proven reputation as an industry standard for issuing non-standard digital resources.

**INV Token will:**

- Serve as an internal payment solution for access- and use of all functions and services on the Invest platform.
- Be used as a social reward and reputation system.
- Be a payment instrument on the profits generated through the use of our platform.

**INV Token will not:**

- Pay dividends or profits of any kind, including buyback.
- Enable holders to vote on company matters.
- Control the company or give/implicitly ownership in any way.

# Value and utility

## VALUE FOR TOKEN HOLDERS AND PLATFORM USERS

INV is the base currency for our platform and will be used to pay all fees (subscription, profit fee) on the platform. There will be a fixed supply of INV tokens in existence. After initial issuing, **no further INV tokens will ever be created.**

- Our platform users must stake INV tokens to access all functionalities on our platform. Additionally, INV tokens will be used as an internal currency on our platform.

## INV token use model

- To access our platform users will have to stake a fixed amount of INV tokens. Staking INV tokens allows access and use our all services and functions on the platform.
- Any INV tokens exceeding the fixed amount necessary for staking will be used as an internal payment solution on our platform.
- The user pays a total of 25% of the profits made through the use of our platform. No profits = no cost. This means that anyone subscribing to our platform will never be charged on losses, essentially using our platform for free. The 25% tax on profits will be divided in the following manner: 15% will go to the trader which he/she is following. 10% will go to our platform. Of the 10% that goes to Invest platform, 5% will be burned. (This amounts to a total of 5% of the invest platform earnings).
- INV tokens are deflationary:
  - As the users on our platform increase, less INV tokens will be in circulation due to our staking mechanism.
  - Because INV tokens have a fixed supply and 5% of our earnings will be burned, the total circulating supply will further and permanently decrease.
- INV tokens will be used by Invest platform as a reward for its users.

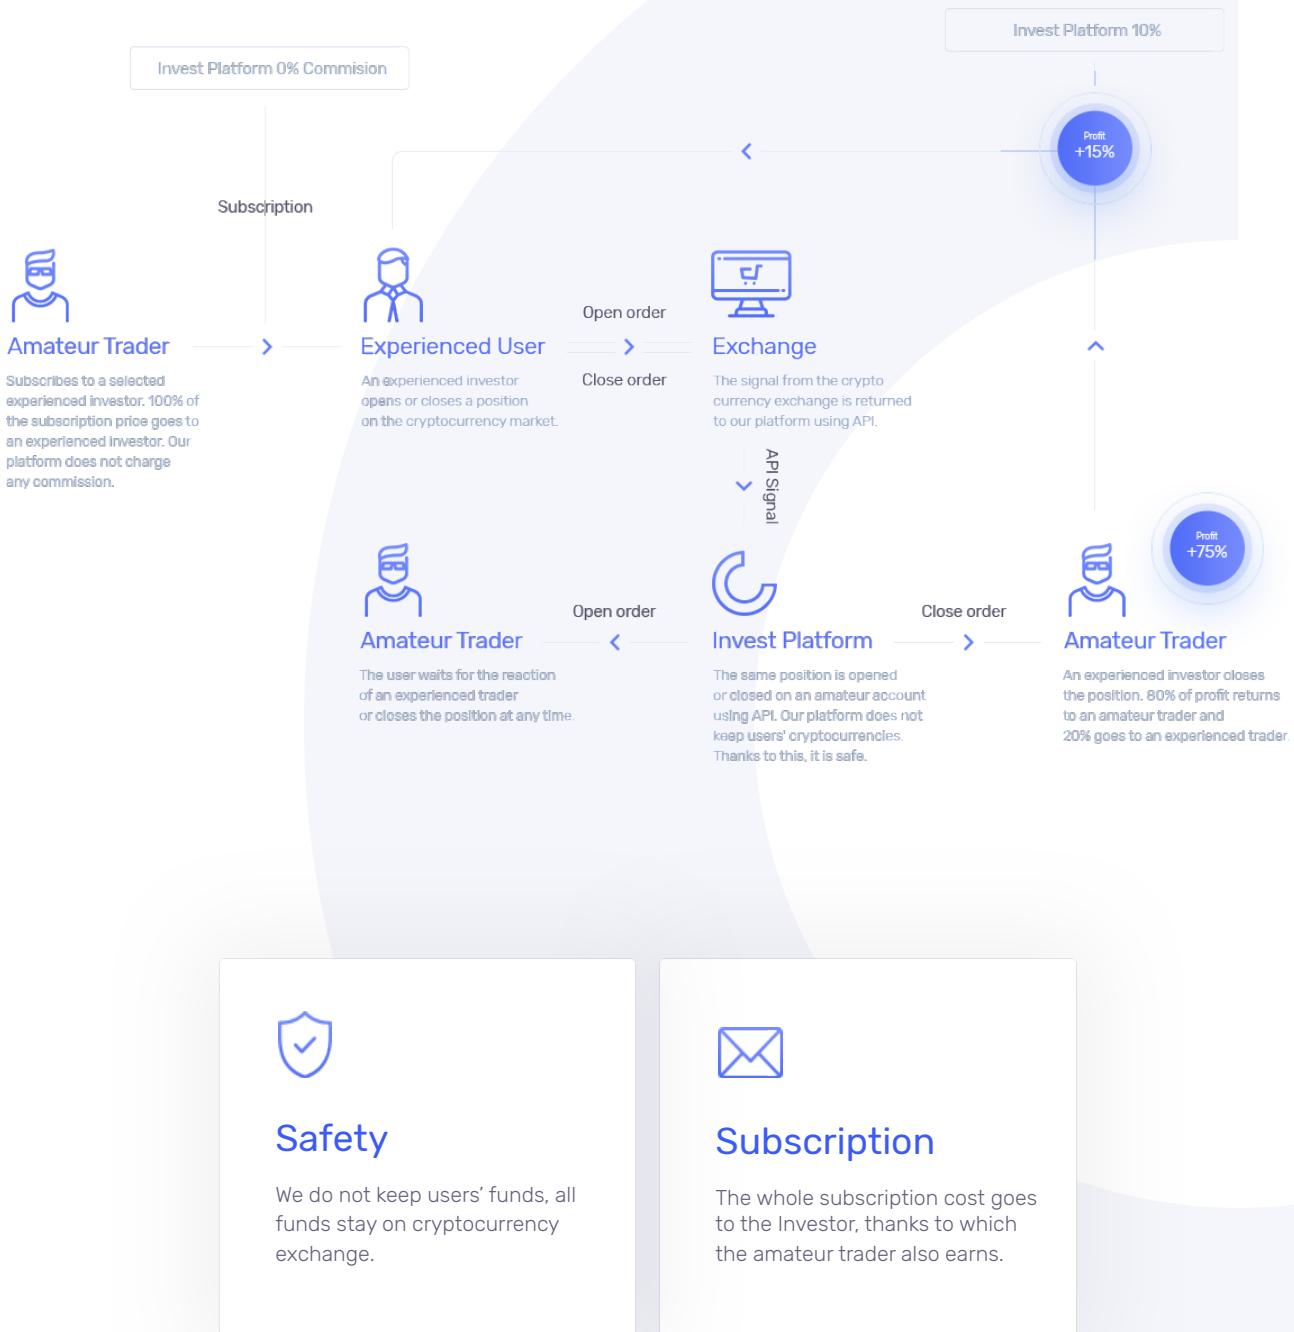

# Rewarding contributions to Invest platform

INV tokens will be used to reward the best investors who provide effective signals and technical analysis. Invest platform will also reward users who actively participate in the promotion of the platform.

- Through its rewarding system Invest Platform will be giving back **up to 10%** of it's total earnings as a monthly reward to the best traders and content-value providers.
- Invest platform will regularly organize competitions where traders can earn INV tokens. Rewarding traders with the highest returns / lowest risk scores.
- Reward traders and content creators with the largest number of followers.
- Reward content creators for putting out high quality content.
- Reward active users with highest referral score
- Reward the best bloggers

# Invest Platform architecture

## Team

Meet our team that will revolutionize investments in the cryptocurrency market.

We are an experienced and professional group of developers who have been working together since 2013, under the company Caviarsoft.com, creating web- and mobile applications for clients from all over the world. People working in our team have experience in large corporations e.g. Unilever, Samsung, Coders Lab, MailOnline. We understand crypto investments from personal experiences and feedback from the crypto community.

# Token sale

## Pre-sale

Pre-sale will start on 26<sup>th</sup> May and run until 15<sup>th</sup> July 2018.

## Public token sale

Public sale will start on 15th August and run until 30th September 2018.

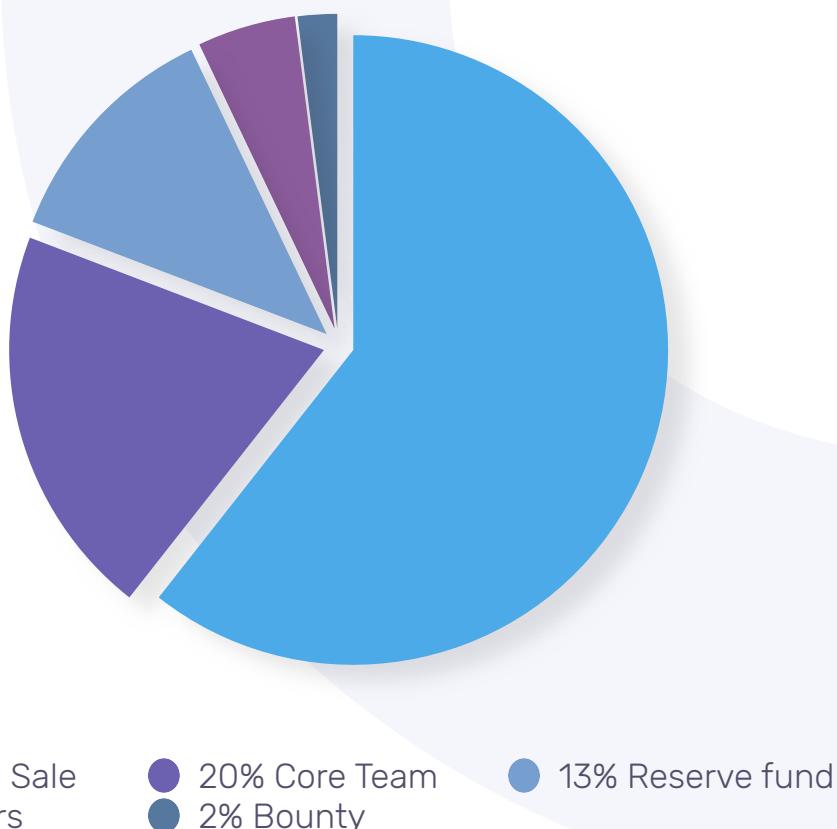

We will release 210 million tokens with the ticker symbol INV for the token sale at a base of around \$0.14 (website: <https://investinbrokers.com>)

Soft Cap: \$1 500 000

Hard Cap: \$15 000 000

**Unsold tokens will be burned.**

The tokens will be allocated in the following manners:

The Invest Platform team will be on a 2-year vesting schedule.

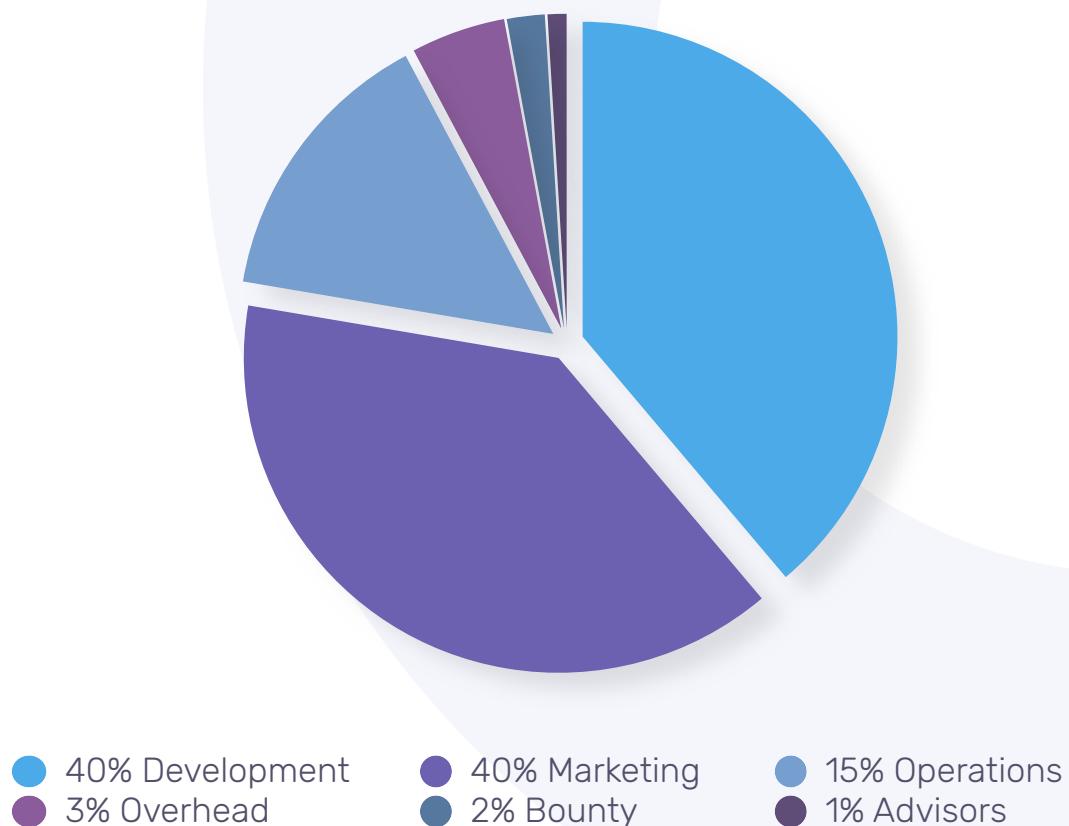

The team will receive 1/4 of their allocation 6 months after the end of the Public Sale. Every month thereafter, the team will receive 1/24 of their allocation until the 2-year vesting schedule is finished.

No one is exempt from this vesting schedule including co-founders and advisors.

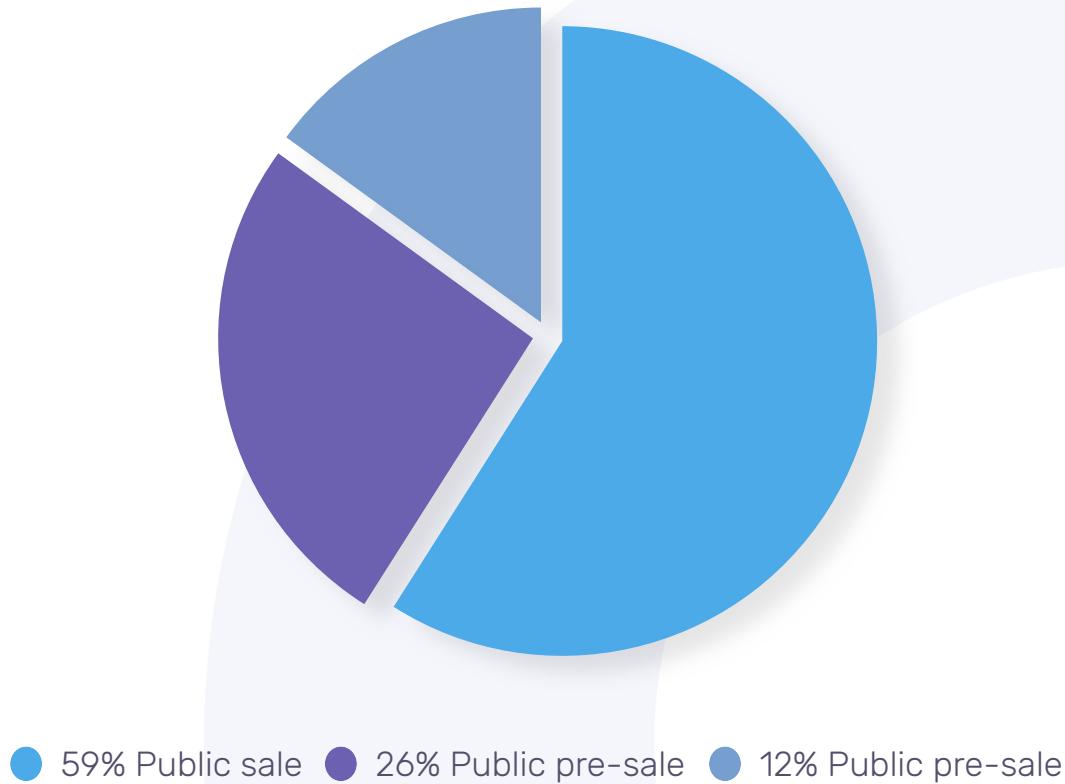

For information on Pre-sale, join our Telegram channel:

<https://t.me/investinbrokers>

Fund allocation:

Token sale allocation, 60% of total supply:

## Token Sale Bonus System

It is possible to take advantage of the following bonuses during token sales:

Private pre-sale: 50%

Public pre-sale: 30%

Public Sale: 0%

# Bounties:

Otherwise from the bonuses , we are also entertain up to 2% from the total number of tokens to reward individuals for supporting the Invest token sale.

Bitcoin talk bounties details: <https://bitcointalk.org/index.php?topic=3072574>

- Community Management – 2 000 000 INV
- Signature Campaign – 600 000 INV
- Translation Campaign – 1 000 000 INV
- Youtube Campaign – 1 500 000 INV
- Blog and Media Campaign – 1 000 000 INV
- Facebook Campaign – 1 500 000 INV
- Twitter Campaign – 1 500 000 INV
- Telegram Campaign – 400 000 INV

Bonuses earned during the bounty-campaign will be credited to the participants' accounts within a week after the closing of the Public Token Sale.

# Cryptocurrency exchange listing

Tokens can be easily bought or sold on numerous cryptocurrency exchange markets after the token sale campaign finishes.

The number of exchange markets will grow with the increase in the platform trade turnover and the users' demand from different countries. Our team is planning to introduce INV tokens to more than 10 international cryptocurrency exchange markets.

It will be possible to exchange INV tokens for any of fluids cryptocurrency (BTC, ETH).

The INV token will be available on the first exchanges within few weeks of the end of public sale.

# Roadmap:

## Q2-Q4 - 2017

- Conceptual creation of Invest Platform
- Market research and analysis
- Strategic development of the business plan
- Invest Platform proof of concept

## Q1 - 2018

- Publishing the Invest Platform white-paper
- Creation of a dedicated website
- Team expansion and strategic recruitments
- Business plan finalisation
- The introduction of the Invest Platform to potential traders
- Start of a first marketing campaign
- Building the Invest Platform community
- The presentation of the project for early investors

## Q2 - 2018

- Launch second marketing campaign
- The project presentation for all potential users
- Smart contract implementation
- Open registrations to Invest Platform
- Create a traders database
- Token Pre-sale

## **Q3 - 2018**

- Launch third marketing campaign
- Product v0.5 release and testing
- Completion of Invest Platform demo
- Public sale
- Token distribution and unlocking
- Exchange listings of INV token
- Mobile application development

## **Q4 - 2018**

- Launch fourth marketing campaign
- Adding further functionality to the platform. (e.g. Trading alerts)
- Invest Platform product release v1.0

## **Q1 - 2019 and onward**

- Mobile application release
- Further improve the platform adapting to specific needs and wants of our users
- Further pursue strategic partnerships with traders and exchanges
- Continue launching marketing campaigns to promote brand recognition and attract users

Caviarsoft Limited

11nd Floor,

40 Tooting High Street,

Tooting Broadway,

London, SW17 0RG,

United Kingdom

Company number: **08422047**

Company website: <https://caviarsoft.com>

This Token sale whitepaper and the documents attached therefore or associated with contain forward-looking statements within the meaning of Section 27A of the Securities Act and Section 21E of the Exchange Act, which are subject to the safe provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements, including, without limitation, statements regarding anticipated use of proceeds from the Token sale, are based on current expectations, estimates and projections about our industry, Company management's beliefs, and assumptions made by Company management. Words such as "anticipates," "expects," "intends," "plans," "believes," "seeks," "estimates," and variations of such words and similar expressions are intended to identify such as forward-looking statements. These statements are not guarantees of future performance and are subject to certain risks, uncertainties and assumptions that are difficult to predict; therefore, actual results may be different materially from those expressed or forecasted in any forward-looking statements due to a variety of factors, including, without limitation, our ability to meet the minimum Token sale amount, if any, unanticipated costs and expenses related to the Token sale, changes in Company's financial condition or business strategy that impact the use of proceeds from the Token sale, and other factors. The risks and uncertainties include those noted in "Risk Factors" document provided in connection with the Token sale (available on Token sale website). Excessive reliance should not be placed on the statements in this whitepaper or any associated materials, which are based on information available to Company on the date thereof. Company undertakes no obligation to update any forward-looking statements, whether as a result of new information, future events or otherwise, except to the grade that Company is required to do so by law.

The grade of the Tokens sold in connection with this Token Sale may be securities under U.S. Securities Act of 1933, these Tokens are offered only outside of the United States to non-U.S. persons, pursuant to the provisions of Regulation S of the U.S. Securities Act of 1933, as amended. These Tokens have not been and will not be registered under the Securities Act, and may not be offered or sold in the United States or to U.S. Persons absent registration or under an applicable exemption from the registration requirements and the purchasers should not assume they will be able to resell their Tokens. Neither the Securities and Exchange Commission nor any state regulator has passed upon the contribution or given its approval to the Tokens, the terms of the Token Sale, or the accuracy or completeness of any associated materials. Buying Tokens involves risks, and purchasers should be able to bear the loss of their entire purchase. All purchasers should make their own determination of whether or not to make any purchase, based on their own independent evaluation and analysis.
